Summer of 1871.

ALL KINDS OF FARMING IMPLEMENTS.

REAPERS, MOWERS, THRESHING MACHINES Hay Rakes, Plows, Plow Points, Corn Plows and Cultivators, Road Plows and Scrapers, Farm Bells,

Guissini) G . We would call particular attention to the NEW IMPROVEMENT in the EXCELSIOR BEAPER AND MOWER, the "Eccentric by which a quick or slow motion is easily obtained by simply moving a lever. This lever is so arranged that the change can be made by if driver WHILE THE MACHINE IS IN MOTION. Another advantage in this improvement is that the inter-bar can be clearled from six eight inches higher than in any other machine. There are many other improvements to this Reaper and Mower which add greatly to its got qualities as a combined Machine which it is not necessary to enumerate. We have a combined machine the HUB of our HAY RAKE, which we believe will make it superior to any Eake now in use.
